

SV WRAP HD™

Single Vision

SV Wrap HD is uniquely customized for wrap frames and sunglass wraps. Through software optimization, Wrap HD eliminates peripheral distortions in wrap frames.

BENEFITS

- Distortion minimization
- Wider field of vision
- Available in 6 and 8 base.
- Easy to edge for conventional, sport or sunglass wrap frames.
- Personalized for each prescription, face and frame (*measurements for pantoscopic tilt, vertex distance and panoramic angle can be added*).

This image shows the difference between a conventional Single Vision Wrap lens and the Single Vision Wrap HD™ lens. In the conventional the pupil has an error of 0.25. However, Single Vision Wrap HD™ provides the wearer with accurate power in the pupil and in almost any gaze direction.
