

WE EXPANDED OUR TEAM!

We are excited to announce that we have expanded our team and made significant improvements in our operations to enhance our services. Be prepared to hear new voices when you contact us, and please join us in extending a warm welcome to our new Customer Representatives!

Bryant

Doni

We have made changes to our surfacing layout in order to improve production efficiency and better serve you. Currently, we operate four automated digital Satisloh lines (first picture below) that are strategically spaced to allow our surfacing manager to have visibility of all indicator lights from the center of the department.

In addition, the other two pictures showcase our robotic finishing department, featuring the following edgers: 1 Bisphera TBA, 1 Bisphera Non TBA, and 1 Racer.

At US Optical, we prioritize swift, high-quality service. Over 70% of Uncut Lenses with No Glare Coating are shipped in just 24 hours. Choose US Optical for reliable, professional results. Where "Fastest Lab in America" is more than just a tagline, it is our culture.

COMFORT W2+ DISCONTINUATION

As a reminder, Varilux Comfort W2+ is NOT available in Transitions GEN S, while Varilux Comfort Max is fully available. All other materials for Varilux Comfort W2+ will still be available until they are removed from MVC in July and private pay at the end of the year.

We recommend you upgrade your patients to Varilux Comfort MAX which has full availability in Transitions GEN S.

Be aware that Essilor is working towards a portfolio simplification and with that, Varilux Comfort W2+ will be discontinued in the near future. Varilux Comfort W2+ will be removed from Managed Vision Care catalogs by July 10, 2024.

THE ULTIMATE VISUAL EXPERIENCE

USO Absolute HD

Absolute HD Lenses seamlessly integrates the latest advancement in digital lens manufacturing to create the Ultimate Visual Experience for every patient.

Absolute, our premium lens design for the discerning wearer, was created using a radical approach offering unrivaled smoothness of design, thus minimizing swim effects and providing excellent patient comfort and rapid adaptation.

Our raytracing technology provides more consistent optical performance over the range of prescription powers, and offers wider viewing areas for patients with hypermetropia, improved distance area for patients with myopia and clearer image quality in main viewing areas. Our manufacturing process considers your parameters and choice of frame (back vertex distance, pantoscopic tilt and face wrap) to compensate the prescription. This results in best as worn condition, is ideal for sports and fashion wrap frames and offers sharper and higher resolution vision.

Absolute also sports excellent binocular balance.

Ideal For
Experienced progressive wearers looking for the best quality design.
Sports wrap and fashion frame wearers.

Corridor - 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20mm

Addition - +0.50D to +3.00D in steps of 0.25D
